

## PRODUCT INTRODUCTION

# MICRO-PAVE AVIATOR

## SEALCOATING FOR AIRPORT PROJECTS

### BASED ON ASPHALT EMULSION

with Hot Blended Rubber polymer & Specialty Chemicals.

*An innovative product, the very **first** of its kind in our business.*

### STAR MICRO-PAVE AVIATOR;

- Far superior in performance than conventional mix designs where rubber is mixed on the job.
- Meets and/ or exceeds airport performance tests & specifications.
- **STAR MICRO-PAVE AVIATOR** contains the required rubber and specialty chemicals which are hot blended in the sealer. No on the job blending of rubber latex and excessive amounts of water for (viscosity control).
- Minimal time needed for the preparation of the mix for the job.
- No on-the-job inspection (for rubber amounts) is needed.
- Pre-shipment certification may be issued by STAR.
