

STAR MICRO-PAVE AVIATOR **SEALCOATING FOR AIRPORT PROJECTS** **BASED ON ASPHALT EMULSION**

GENERAL DESCRIPTION

STAR MICRO-PAVE AVIATOR is an outstanding sealer that is far superior to the conventional asphalt emulsion based sealers. **STAR MICRO-PAVE AVIATOR**, as supplied, already **contains the rubber** and specialty chemicals, which impart an outstanding performance. The rubber is hot-blended during the manufacturing process. The superiority in performance has been established in field performance on several airport projects.

HIGHLIGHTED BENEFITS

STAR MICRO-PAVE AVIATOR:

1. **Is a unique product** with an unconventional technological approach.
2. **Has far superior performance** to the conventional asphalt emulsion based sealers.
3. **Does not need excessive amounts of water** in the mix design. The conventional sealers, after adding rubber latex, become excessively thick and require large amounts of water for viscosity control.
4. **Certified** to meet and/ or exceed specifications.
5. **Is highly Cost Effective** & performs better than mix designs where the rubber latex is added on the job.
6. **Savings in Labor Costs.**

STAR MICRO-PAVE AVIATOR yields better performance in fewer coats, and does not need special equipment, e.g. drag box, etc.

APPLICATION NOTES

STAR MICRO-PAVE AVIATOR is applied using conventional methods, spray, squeegee, brush, etc.

Dilution -Max 20% by volume on the amount of concentrated.

COMPOSITION OF MIXTURE, Using STAR MICRO-PAVE AVIATOR

Sealcoat Type	STAR MICRO-PAVE AVIATOR	WATER	AGGREGATE	APPLICATION OF THE MIX.
	GALLONS	GALLONS	LBS.	GAL/SQ.YARD
RUBBERIZED SAND SLURRY	100	20 max.	300-800	0.14-0.17
RUBBERIZED EMULSION	100	20 max.	None	0.10-0.12

PRECAUTIONS

Keep out of reach of children

Follow all safety instructions for handling and storage.

Contains refined coal tar. Read the Material Safety Data Sheet (MSDS).

Keep the partially used containers tightly closed.

WARRANTY & DISCLAIMER
